

## Easy to use online PreQualification/Application

FastApp is a turnkey method for financial institutions to offer their customers an easy-to-use electronic loan prequalification request, thus allowing financial institutions to remain competitive in today's technological environment.

### **Convenient Accessibility**

Customers can easily access, complete and submit the prequalification from the Bank website on any computer, tablet or mobile device from anywhere with no faxing required.

### **Customizable Product Selection**

The financial institution can control which loan products are available for customer selection.

### **User Friendly**

Customer has the ability to save entered data in order to complete later and can review and edit data before submitting.

### **Limit Lending Area**

The lending area can be limited to specific zip codes.

### **Customizable Aesthetics Within the Application**

The financial institution can customize the color scheme for consistency with the Bank website and branding.

### **Notification Upon Submission of Prequalification**

The Bank will receive an email notification immediately upon submission of a loan prequalification.

### **Convenient Data Formatting**

Submitted prequalification data can be reviewed within the Bank Administration screen or in a PDF format.

### **Interfaces with CoPilot Loans**

Data from FastApp can be exported and auto-fill into a Loan Product in CoPilot for completion of loan documents or a denial.
